

JULY 2023

## How to clean debris from a contactor using compressed air to eliminate buzzing.

### TOOLS NEEDED

- Compressed Air

### PROCEDURE

- STEP 1** Turn off power.
- STEP 2** Carefully pry off “T” shaped plastic covers on each side of the contactor by pulling out and upward as in Figure 1 and 2.
- STEP 3** Push plunger up and down while spraying compressed air in the contact area as in Figure 3 to remove any dust or debris.
- STEP 4** Replace “T” shaped plastic covers.
